## SUMMARY

---

Software Engineer with experienced in web and mobile development with expertise in PHP, JavaScript, TypeScript, and modern frameworks like Laravel, CodeIgniter, NextJS. Strong background in backend development, API integration, and system maintenance.

## SKILLS

---

PHP, JavaScript, Typescript, Laravel, CodeIgniter, NextJS, RestAPI, GraphQL, NodeJS, TailwindCSS, Context API, Responsive Design, Figma, Git, Linux, HTML, CSS, Problem Solving, Data Structure, Agile methodologies

## WORK EXPERIENCE

---

### Somethinc - Beautyhaul

**March 2023 - Present**

Software Engineer

Full-time | *Onsite*

- Added a lot of new features such as verifying OTP phone number, product refund, employee voucher, quizzes, and more features into the project from frontend into backend using CodeIgniter.
- Create migration for adding new table and other update into the database using NodeJS
- Optimised query that are to slow to load on admin page and also doing maintenance for fixing bugs that got reported from the user or from QA using CodeIgniter
- Designed and implemented APIs that seamlessly integrated with our mobile app on getting the data that will be showed on the App using Laravel
- Designed and implemented APIs that seamlessly integrated with major marketplaces like Tokopedia and Shopee, for getting all the order to our website and managing stock on those marketplace using CodeIgniter and Laravel

### ICUBE

**September 2022 - January 2023**

Software Engineer

Full-time | *Remote*

- Added new features across multiple projects such as integrating stock items using Laravel, adding upload image on chat app using NextJS, and creating skeleton app that have GraphQL for middleware chat projec.
- Improved system reliability by performing bug fixes and maintenance on various projects such as Magento, Laravel, and NextJS projects

- Created multiple efficient GraphQL queries and mutations for chat middleware project, to retrieve data from database and send it to frontend using Laravel
- Built numerous REST APIs and webhooks for middleware and client projects, facilitating seamless communication between systems and improving integration using Laravel
- Create documentation for REST APIs and GraphQL that I made for other engineer and QA, ensuring maintainability and easy handoff to other developers

## **ICUBE**

**March 2022 - September 2022**

Engineer Trainee

Internship | *Remote*

- Completed training from backend to frontend using Magento and NextJS in preparation for an upcoming project, enhancing technical skills and project readiness
- Successfully added new features such as integrating sync stock items between marketplaces using cron so that the items will be connected between each other across marketplaces using Laravel
- Enhanced project stability by performing bug fixes and maintenance on the middleware project that I was assigned to using Laravel
- Conducted thorough QA testing for assigned projects, ensuring functionality and quality, resulting in a more robust final product

## **Internet Soludi Layanan Informasi Mandiri**

**October 2021 - December 2021**

Mobile App Developer

*Part-time | Remote*

- Designed wireframes for the upcoming project, outlining the app's structure and user interface, which guided the development process using Figma
- Expanded the foundational app skeleton, establishing a robust architecture for the project and facilitating efficient development using Android Studio with java as its language
- Proactively addressed and resolved various bugs within the Flutter-based app, ensuring smooth functionality and improving overall performance
